Winland Electronics Environmental Compliance Statement

Winland Electronics is an industry leader in critical condition monitoring devices. Products including EnviroAlert, WaterBug, and TempAlert are designed in-house to monitor critical conditions and protect against loss of assets due to damage from water, excess humidity, extremes of temperature, and loss of power, among others, across industries including health and medical, grocery and food services, commercial and industrial, as well as agriculture and residential. Winland Electronics markets and sells its line of proprietary critical condition monitoring hardware and subscription service products primarily through a global network of distributors, dealers, security installers, and integrators. Winland Electronics' products are compatible with any hardwired or wireless alarm system. Winland Electronics also offers a critical environment monitoring solution called INSIGHT, an automated, cloud-based platform that provides early alerting, reporting, and logging services designed to ensure regulatory compliance.

Declaration of Conformity

PFAS (Per- and Polyfluoroalkyl Substances) PFAS are a group of manufactured chemicals widely used in industrial and consumer products for their resistance to heat, water, oil, and stains. Various global regulatory bodies are implementing restrictions and reporting requirements related to PFAS substances due to environmental and health concerns. Winland Electronics is committed to monitoring evolving PFAS regulations and working closely with our suppliers to obtain material composition information related to PFAS content in our products and components. Based on information currently available from our suppliers and internal assessments, Winland Electronics products are not intentionally manufactured with PFAS substances unless otherwise stated in product-specific documentation. However, due to the complexity of global supply chains and ongoing regulatory developments, Winland Electronics cannot guarantee the complete absence of trace PFAS substances in all materials or components. Winland Electronics continues to evaluate supplier disclosures and regulatory updates to support compliance with applicable PFAS-related legislation and customer requirements. This declaration applies to the below-referenced Product(s) included with this statement.
