New Product Announcement

Dear Customer,

Winland Electronics is excited to announce the release of its MTA-2, anticipated to be available for order during December 2021. The MTA-2 was designed to replace the majority of the current line of Temp-Alert® Products. The TA-40 will remain in this category and available for sale. The MTA-2 combines the features and capabilities from existing products into one simple device.

This letter serves as a formal notification that Winland Electronics is discontinuing the production of the products below. Winland Electronics acknowledges the obligation to promptly inform its customers of its intent to end life of products to enable its customers to prepare for alternatives.

The following products will no longer be available after current inventory levels are sold. As of the date of this letter there are sufficient levels for the remainder of 2021 with the TA-1 and TA-2HL. The MTA-1 is expected to be available into Q1 2022. However, demand will influence quantities available for the three items. When ordering it is advised to obtain availability by contacting our office.
