CLOUD BASED ENVIRONMENTAL MONITORING SOLUTION
## Please Read Before Installing

The EA800-ip now supports 12 sensors;
(8) Wireless Sensors and (4) Wired Sensors.
There are 8 assignable alarm loop connections.

The firmware now points to our new **INSIGHT** cloud service* at www.winlandinsight.com and is identified by
the sign-on screen as shown to the right .

*cloud access requires a fee-based subscription

If you do not have an **INSIGHT** account, email insightsupport@winland.com to request one

To register the EA800-ip device to **INSIGHT**, you will need to have the SN number and Key. These are printed on the label attached to the Ethernet jack, which is accessible from the back of the EA800-ip device shown here.

NOTE: *The device must be connected to* **INSIGHT** *to be added to an account*

To troubleshoot network connectivity issues please see the **Quick Start Guide** packed with the device or download it by scanning the QR code here -

Hereby Winland Electronics, Inc. declares that this environmental monitoring equipment is in compliance with the essential requirements and other relevant provisions of Directives 2014/53/EU; 2014/30/EU; 2014/35/EU; 2011/65/EU. The declaration of conformity may be consulted at:
