

WATERBUG®

W-S-S **WATERBUG SURFACE PROBE** **SUPERVISED**

W-S-U **WATERBUG SURFACE PROBE** **UNSUPERVISED**

If the unit is to be bolted down, as in a permanent installation, drill only through the innermost center recessed area. Drilling anywhere else may damage the internal wiring causing the unit to fail.

Extend probe wiring length using 22-18 AWG twisted pair.
See product manuals for cable lengths.

FOUR PROBE CONTACTS

Mount the probe to ensure these four stainless steel contacts are against the surface to be monitored. For example: they must be against the floor to detect water on the floor.

MOUNTING DRILL HOLE

Drill in the innermost center circle only.

To insure proper operation, test weekly.
